I am a Software Developer possessing excellent problem solving and research skills. I am analytical with a creative approach to solving technical issues. I am client focused and results driven. I am a team player with proven ability to work with technical and non-technical personnel.

WORK EXPERIENCE

TMC Bonds, LLC, New York, NY

March 2014 – Present

Full Stack Software Developer

Responsible for delivering rich user experience using Sencha's ExtJS object oriented Javascript framework. Supported data delivery over ajax through a DWR interface to a Java Tomcat server. Created comprehensive build scripts with Ant, Google Closure Compiler, and Sencha CMD including customizing the tools to our needs.

Freelance Web Developer

OnceUponAChart.com

Developed the site and editing page using pure php, and used jQuery for some visual effects as well as for ajax updates on the editing page.

LoveAndMakeup.com

Developed custom Wordpress theme as the CMS of the site, and used jQuery, along with jQueryCycle and jScrollPane, to add some functionality as well as visual effects.

Research Foundation of CUNY, New York, NY

July 2010 – June 2013

Systems Administrator

Responsible for providing technical support for 25 workstations and 18 servers campus wide. Investigate and troubleshoot log-on, software, and hardware issues. Research various vendors to determine if software meets department standards. Communicate with vendors to efficiently resolve problems. Perform software installation and updates.

Assist in training new hires to install software and fix issues on workstation computers.

Serve as subject matter expert in Linux setup, general use, and maintenance.

EDUCATION

BE, Computer Engineering, The City College of New York, 2012

GPA: 3.684
